### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: 1-13 are allowed over the prior art of record. Current invention teaches a circuit breaker having an inertia member, biased via a first and second spring, to provide an inertial time delay mechanism to a trip unit. A surface of the inertia member is engaged with a switch (for providing an input to the trip unit) to maintain the switch in a first condition. Movement of the inertia member to the terminal position permits the movement of the switch from the first condition to the second condition, thereby providing a time delay. Claimed delay mechanism in combination with the claimed structure of the current breaker are neither disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
